

YOUR LAWN... IS THERE ROOM FOR IMPROVEMENT? LET'S GET STARTED!

For a healthier thicker lawn, consider Greener Earth organic-based feedings based on better science from the roots on up. Healthier. Smarter. Better for bare feet & paws. "Convenient, continuing service, season after season. Year after year."

YOUR LANDSCAPING... IS IT "HO-HUM"? OVERGROWN OR LACKING SOMETHING YOU WANT? LET'S TALK!

SPRING LAWN

Two balanced organic-based feedings to improve color & as the season progresses -- to improve your lawn's thickness. It's the best defensive action against weeds & damaging insects. May include crabgrass pre-emergent/preventer. *Plus helpful recommendations.*

SPRING #1: _____ **SPRING #2:** _____

SUMMER LAWN

Two balanced feedings to prevent thinning out & to defend against stress from heat, damaging insects & fungus diseases. Controls applied for heat-loving weeds. So let's "partner up" & face the usual summer heat and dry spells. *I'll included special tips for your lawn's conditions!*

SUMMER #1: _____ **SUMMER #2:** _____

FALL LAWN *Remember, we return automatically next spring!*

Two balanced feedings to keep building "better legs" (deeper roots) until the ground freezes. Golf course pros know these are the most crucial feedings for turfgrass. *According to MSU, fall is even more effective than spring in controlling weeds to assure "Weed No-Shows" next spring.*

FALL #1: _____ **FALL #2:** _____

LAWN CORE AERATION

Did you know golf courses aerate 2+ times annually? We recommend this annual remedy.
Benefits: better uptake of water & fertilizer. Stronger roots. Reduced thatch & soil compaction!

CORE AERATION _____ **Notes:** _____
